PROFESSIONAL SUMMARY

Computer Science and Engineering undergraduate with hands-on experience in DBMS, Python, and projects in IoT and AI/ML. Strong foundation in C programming, data structures, and backend development. Skilled in problem-solving, debugging, and building practical solutions through academic projects. Eager to learn new technologies and apply knowledge in real-world environments.

EDUCATION

Bachelor of Technology in Computer Science Engineering / B.Tech (Your Branch)

Symbiosis institute of technology, Nagpur

(2024-2028)

Higher Secondary (12th)

Kamla Nehru Mahavidyalaya, Nagpur (2024)

Secondary (10th)

Gayatri Convent High School, Nagpur(2022)

PROJECTS

IoT Automated Shade Opening System (Arduino UNO)

- Designed a sensor-based system using Arduino and moisture sensors to automatically open shades during rainfall, protecting indoor spaces. Documented architecture and authored an IEEE-format research paper.

Student-to-Industry Transition Intelligence Platform

- Developed an AI-based analytics platform to evaluate student readiness for industry roles.
- Mapped academic curriculum with job outcomes to identify skill gaps.

Fake Certificate Detection using Blockchain

- Built a blockchain-based system to verify authenticity of certificates.
- Enhanced data security and prevented fraudulent document usage.

TECHNICAL SKILLS

- Programming Languages: C, Basic Java, python
- Core Concepts: DBMS, Data Structures (Arrays, Linked Lists, Stacks, Queues, Trees – basics), OOP Concepts, DAA, CO and OS
- Web Technologies: HTML, Full-Stack, CSS (Basic)
- Database: MySQL (CRUD, Joins, Normalization)
- Tools: Git, VS Code, Arduino IDE, Linux (basic commands)
- Other Skills: API usage (basic), Data handling, Debugging

Internship

Cybersecurity Intern — Edunet Foundation (VOIS for Tech Program)

Certification

- Red Hat System Administration 1 (RHI 24 - RHA) 2026
- Python Programming with Red Hat(AD141-RHA) 2025
- Red Hat System Administration 1 (RH124 - RHA) 2026
